Machine-Ready is Lean Ready

Load Standard Blanks Directly into your CNC Machining Centers

Standard Machine-Ready Blanks are pre-configured in hundreds of dimension and alloy combinations. Each precision Standard Blank arrives square, flat and parallel within $\pm .002$ " of specified dimensions all around, ready to load directly into your machining centers. Standard Machine-Ready Blanks are available in a wide range of materials and sizes with quick delivery for short and long runs.

- Flat Machine-Ready blanks are made to stay that way, reducing part movement
- Great for prototypes, first articles, and production runs – order from one to thousands
- Eliminates the need for in-house squaring and flattening
- Machine-Ready Blanks are precision cut, milled four sides and duplex surface ground two-sides for flatness and finish

**Square, Flat and Parallel
within $\pm .002$ " of Stated Dimensions**
