## Any Size, Any Shape, Any Quantity

**SHIPPING  
INCLUDED!**

All quotes include  
regular priority shipping.

- Eliminate Material Prep
- Reduce Set Up Time
- Shorten Cycle Time, Chip-to-Chip

# Machine-Ready is Lean-Ready. Go from Receiving Directly into your CNC Machining Centers.

Custom Machine-Ready Blanks from TCI Precision Metals let you get right to the high value process of finish-machining by eliminating material prep and other time consuming processes. Machine-Ready Blanks can be furnished as close as +/- .0005" dimensionally and as close as .0002" in flatness, squareness and parallelism.

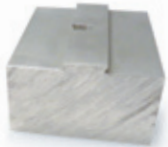

## Custom Machine-Ready Blanks

Typically, square, rectangular or round stock milled to your net specifications. TCI Precision Metals specializes in producing FLAT plate stock, which minimizes part movement during final machining.

## Feature-Added Blanks

Milled to the same tight tolerances as Custom Blanks, but include one or more added features specified by you – milling, hogging, roughing or finish CNC machining, if required.

## Machine-Ready Dovetail Blanks

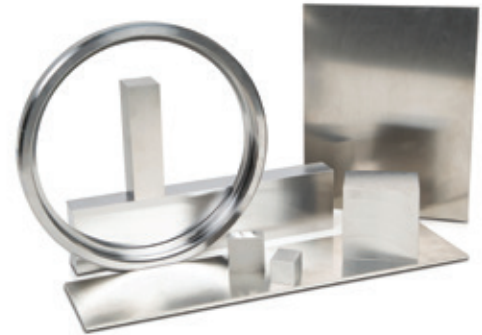

Made-to-order from one to thousands, each Machine-Ready Dovetail Blank includes a precision dovetail to match your brand and model of workholding fixture. Perfect for 4- and 5-axis machining.

**We welcome customer supplied material too!**
